Fwd: Fwd: Letter to Candidates

Hi

I received a response to Groundswell Gloucester's letter about the Rocky Hill Mine and received this as well. I have informed Kerry that this response needs to go to MCWAG. Forwarding this on for your information.

Best Wishes

Di

Dear Di,

I also note that you have asked candidates their views on Climate Change, including in the Shire.

Amelioration of Climate Change, including in the Shire, is a very large topic to debate and is a global issue. However, bringing global back to local, it is the responsibility of every individual to be pro-active on how they impact on the environment and how they contribute to climate change. Likewise, it is up to every business or organisation (including MidCoast Council) to consider climate change in every aspect of the running of their organisation. This is through examination of their service delivery policies and being pro-active in keeping their organisation up to date and innovative in relation to the environment and their impact on climate change.

Regards,

Kerry Anderson on behalf of Group D
