**Subject:** Re: Questions for Candidates

Hi Genevieve , Thanks for your email for what I can answer to my knowledge,

There are many ways of Alternative Energy can be used in our area ,with the merging of the 3 Councils we should be looking at ways for energy, not just for our environment but also to relieve the stress of power bills for our Community.

For my knowledge the Council doesn't issue Mining Licences and the EPA is the authority in many areas not the Councils.

Sustainability of our Environment and the Respect of our waterways is something I really have a strong belief in , most of our tourism industry is built around our pristine waterways and our natural habitat in which we need to protect. ( and one of the reasons I brought my Family here).

Thanks and I hope I have answered some of your concerns.
